

VERIDOC — FORENSIC INVESTIGATION REPORT

Generated on 2026-10-08 13:31:12 UTC • Digital Document Integrity Analysis

File Name:	Certificate_2026.pdf	Overall Concern:	HIGH CONCERN
File Type / Pages:	PDF • 2 Page(s)	Total Findings:	7 (7 High, 0 Med, 0 Low)
SHA-256 Hash:	b6235f36294bb1b37dbc05d42acaca11336ca934459a f39d5db6554321066cc3	Analysis Coverage:	10 / 10 Checks

FORENSIC CATEGORIES SUMMARY

Category	Status / Concern	Findings Count
Content Analysis	HIGH	3
Formatting & Typography	HIGH	1
Metadata & File Structure	HIGH	2
Visual & ELA Inspection	HIGH	1

FORENSIC EVIDENCE OBSERVATIONS

ID	Sev	Observation Title	Location	Description
E01	HIGH	Hidden / Off-Canvas Text Stream Detected	P.1 • Page Background / Coordinates	Text stream contains spans rendered with white coloring (0xFFFFFF) or coordinates outside visible page boundary. Often used for prompt injection, ATS manipulation, or hidden alterations.
E02	HIGH	Confusable Homoglyph Characters	P.1 • Page 1 • Recipient Name	Detected Cyrillic/non-Latin lookalike characters ([HOMOGLYPH_SUB_183]) intermixed within standard Latin words. Commonly deployed to bypass automated string matching or evade fraud filters.
E03	HIGH	Text / OCR Mismatch	P.2 • Date / Seal Region	Visible text rendered inside rasterized graphic differs from or lacks corresponding digital stream text in PDF catalog.
E04	HIGH	Inline Font Family Inconsistency	P.1 • Page 1 • Field 'TR·V'	Text segment '·TR·V' utilizes font 'Courier', diverging from base line font 'Helvetica'. Strong indicator of injected or altered string.
E05	HIGH	Editing Software Signature Detected	P.1 • Document Header / Metadata	Producer/Creator indicates editing software ('Photoshop'): Adobe Photoshop 2024 (Windows). Legitimate official credentials rarely originate from graphic manipulation suites.
E06	HIGH	Chronological Inconsistency in Metadata	P.1 • PDF Date Table	Modification timestamp (2025-11-05) precedes Creation timestamp (2026-01-10). Highly indicative of manual metadata tampering.
E07	HIGH	Spliced Raster Badge / Overlay	P.1 • Page 1 • Region A	Identified distinct raster object Region A with compression disparity inserted into vector credential layout.

TAMPERING HYPOTHESES & ORIGIN INDICATORS

Tampering Hypotheses:	Origin Indicators:
• Possible Text Alteration (HIGH) — Evidence: E01, E02, E03 • Possible Image Manipulation (HIGH) — Evidence: E07 • Possible Metadata Modification (HIGH) — Evidence: E05, E06 • Possible Layout Manipulation (ELEVATED) — Evidence: E04	• Synthetic / AI Indicators: POSSIBLE • Image Manipulation Indicators: DETECTED

AI FORENSIC REASONING ASSESSMENT

Gemma Forensic Reasoner (Integrated Engine):

Cross-correlation of forensic signals reveals multiple high-confidence anomalies. Specifically, 7 high-priority indicators point to potential localized modification. Typographic, metadata, and visual layers exhibit divergent digital signatures that warrant thorough manual forensic verification before document acceptance.

MANUAL VERIFICATION CHECKLIST (INVESTIGATOR ACTIONS)

- [] Verify suspicious date / number
- [] Inspect highlighted regions
- [] Compare with trusted source if available
- [] Verify with issuing authority
- [] Inspect creation and modification dates against official records
- [] Examine official seal and signature under high magnification

FORENSIC DISCLAIMER: VERIDOC is an automated screening and forensic triage platform. This report identifies anomalies, inconsistent metadata, visual artifacts, and hypotheses that warrant human inspection. It does NOT definitively prove whether a document is genuine or fraudulent. Formal legal conclusions must be verified by certified examiners.
