

VERIDOC — FORENSIC INVESTIGATION REPORT

Generated on 2026-10-08 13:18:32 UTC • Digital Document Integrity Analysis

File Name:	DSA JAVA.pdf	Overall Concern:	HIGH CONCERN
File Type / Pages:	PDF • 738 Page(s)	Total Findings:	7 (3 High, 3 Med, 1 Low)
SHA-256 Hash:	ece32a2647d6bfbd9635da8e4f84d811e1d71581e2818df937a60dafbcb7922f	Analysis Coverage:	10 / 10 Checks

FORENSIC CATEGORIES SUMMARY

Category	Status / Concern	Findings Count
Content Analysis	HIGH	2
Formatting & Typography	HIGH	3
Metadata & File Structure	ELEVATED	1
Visual & ELA Inspection	ELEVATED	1

FORENSIC EVIDENCE OBSERVATIONS

ID	Sev	Observation Title	Location	Description
E01	HIGH	Hidden / Off-Canvas Text Stream Detected	P.1 • Page Background / Coordinates	Text stream contains spans rendered with white coloring (0xFFFFFF) or coordinates outside visible page boundary. Often used for prompt injection, ATS manipulation, or hidden alterations.
E02	HIGH	Text / OCR Mismatch	P.2 • Date / Seal Region	Visible text rendered inside rasterized graphic differs from or lacks corresponding digital stream text in PDF catalog.
E03	HIGH	Inline Font Family Inconsistency	P.5 • Page 5 • Field 'Michael T. Goodrich'	Text segment 'Michael T. Goodrich' utilizes font 'Times-Italic', diverging from base line font 'Times-Roman'. Strong indicator of injected or altered string.
E04	MEDIUM	Typographic Size & Baseline Variance	P.175 • Page 175 • Inline Text	Detected point size deviation (2.9pt) on identical baseline within sentence structure. Typical of inserted values in pre-existing template.
E05	MEDIUM	Extended Timestamp Discrepancy	P.1 • PDF Date Table	Document modification date is 115 days after creation date. (Created: 2013-12-05, Modified: 2014-03-31). Indicates post-issuance revision.
E06	MEDIUM	Suspicious Visual Element Boundary	P.26 • Page 26 • Region A	Visual boundary detected at Region A requiring magnification review.
E07	LOW	Excessive Typographic Variance	P.1 • Document Typography	Document incorporates 40 distinct font typefaces, unusual for standardized credentials and institutional certificates.

TAMPERING HYPOTHESES & ORIGIN INDICATORS

Tampering Hypotheses:	Origin Indicators:
• Possible Text Alteration (HIGH) — Evidence: E01, E02, E03 • Possible Image Manipulation (ELEVATED) — Evidence: E06 • Possible Metadata Modification (LOW) — Evidence: E05 • Possible Layout Manipulation (ELEVATED) — Evidence: E03, E04	• Synthetic / AI Indicators: POSSIBLE • Image Manipulation Indicators: DETECTED

AI FORENSIC REASONING ASSESSMENT

Gemma Forensic Reasoner (Integrated Engine):
Cross-correlation of forensic signals reveals multiple high-confidence anomalies. Specifically, 3 high-priority indicators point to potential localized modification. Typographic, metadata, and visual layers exhibit divergent digital signatures that warrant thorough manual forensic verification before document acceptance.

MANUAL VERIFICATION CHECKLIST (INVESTIGATOR ACTIONS)

- ☐ Verify suspicious date / number
- ☐ Inspect highlighted regions
- ☐ Compare with trusted source if available
- ☐ Verify with issuing authority
- ☐ Inspect creation and modification dates against official records
- ☐ Examine official seal and signature under high magnification

FORENSIC DISCLAIMER: VERIDOC is an automated screening and forensic triage platform. This report identifies anomalies, inconsistent metadata, visual artifacts, and hypotheses that warrant human inspection. It does NOT definitively prove whether a document is genuine or fraudulent. Formal legal conclusions must be verified by certified examiners.
